

Program for cafeteria

There is a buffet or a canteen in your company, and during lunch time you have a problem with calculating customer's bill accurately and quickly, then we can help you with our new credit payment system.

With our system the payment in your company's buffets will be possible with proximity RF plastic cards or by electronic pass for employees of company, within the monthly credit allocated by the administration of company.

1. What is the purpose of the system?

Using this system you may quickly and effectively get the orders of customers and confirm considering the type of payment: cash, prepayment of the company, retention of salary or any type of payment which you prefer.

Having LAN, various summery tables are exported as EXCEL files to sphere which is available for accounting and are used during the calculation of salaries.

2. Where can you use our system?

The system can be operated in a company or organization that have catering facilities. Our system is effectively used in companies such as "RUSAL ARMENAL" and "AREMENIAN BRANDY FACTORY".

3. Which structure has our system?

The system consists of;

- both sided display (display of customer, touch screen of cashier),
- terminal reader for proximity plastic cards, which is installed next to cashbox,
- computer,
- system device of calculating for form the base
- data for specific software.

4. How does our system work???

The customer makes his order and the cashier enter it from menu on touch screen. The customer sees own order on display and confirms it by registration card. On the other side of display the cashier confirms the order according to the type of payment approved by the administration of that company.

5. What is the benefit of our system???

By using this system you will have the following opportunities;

- to serve the customers quicker,
 - to have more customers including employees, who prefer non cash/credit type of payment,
 - to have customers , who haven't cash money,
 - analyze the effectiveness of the buffet by issuing all kinds of sales reports in the context of food and the correctness of scheduling lunch breaks in shifts.
-
